

## Molecular Collisions in the Interstellar Medium (2nd Revised edition)

Filesize: 6.52 MB

### ***Reviews***

*Basically no phrases to explain. It really is filled with knowledge and wisdom You are going to like how the author create this book.*

*(Gerald Conn)*

## MOLECULAR COLLISIONS IN THE INTERSTELLAR MEDIUM (2ND REVISED EDITION)

DOWNLOAD

Cambridge University Press. Hardback. Book Condition: new. BRAND NEW PRINT ON DEMAND., Molecular Collisions in the Interstellar Medium (2nd Revised edition), David Flower, Andrew King, Douglas Lin, Stephen P. Maran, Jim Pringle, In the interstellar medium - the space between the stars in galaxies - new stars are born from material that is replenished by the debris ejected by stars when they die. This book, first published in 2007, is a comprehensive manual for studying the collisional and radiative processes observed in the interstellar medium. This second edition has been thoroughly updated and extended to cover related topics in radiation theory. It considers the chemistry of the interstellar medium both at the present epoch and in the early Universe, and discusses the physics and chemistry of shock waves. The methods of calculation of the rates of collisional excitation of interstellar molecules and atoms are explained, emphasising the quantum mechanical method. This book will be ideal for researchers involved in the interstellar medium and star formation, and physical chemists specialising in collision theory or in the measurement of the rates of collision processes.
