Innovative Houses: Concepts for Sustainable Living

By Avi Friedman

Laurence King Publishing. Paperback. Book Condition: new. BRAND NEW, Innovative Houses: Concepts for Sustainable Living, Avi Friedman, Housing is rapidly having to adapt to the global changes of the twenty first century. These include the transformation of the family and the rise of the non-traditional household, increases in construction costs, and concerns over climate change and the depletion of natural resources. Designing residential environments that address these issues is an urgent priority. This book examines the latest residential design trends that have arisen in response to these challenges. Divided into four broad areas, tightly focused thematic chapters look at twenty discrete topics, such as live/work; adaptable housing; prefabrication; water efficiency; green roofs; and innovative landscaping. Each chapter includes an essay which lays out principles, methods and practices. Using text, drawings and photos from a variety of contemporary international practices, the book demonstrates how these ideas can be applied by architects. It offers a comprehensive collection of strategies and examples that will inspire a much needed housing revolution.
