

## Biomolecular Effects of Cold Plasma Exposure

Filesize: 3.81 MB

### ***Reviews***

*I just started off reading this article ebook. It is actually written in basic words and not confusing. I am just very happy to let you know that this is the best ebook I actually have read through inside my individual daily life and can be the finest ebook for possibly.*

## BIOMOLECULAR EFFECTS OF COLD PLASMA EXPOSURE

To download **Biomolecular Effects of Cold Plasma Exposure** eBook, please follow the hyperlink under and save the ebook or get access to other information which might be relevant to BIOMOLECULAR EFFECTS OF COLD PLASMA EXPOSURE book.

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 32 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. The effects of cold plasma exposure on *Deinococcus radiodurans*, plasmid DNA and model proteins were assessed using microbiological, spectrometric and biochemical techniques. Exposure of *D. radiodurans*, an extremely radiation resistant microbe, to O<sub>2</sub> plasma (less than or equal to 25 W, approx. 45 mTorr, 90 min) yielded a approx. 99.999 sterilization and the sterilization rate was increased approx. 10-fold at 100 W and 500 mTorr. AFM images shows that the exposed cells are significantly deformed and possess 50-70 nm concavities. IR analysis indicates the chemical degradation of lipids, proteins and carotenoids of the cell wall and membrane. Intracellular damage was indicated by major absorbance loss at 1245, 1651 and 1538cm corresponding to degradation of DNA and proteins, respectively. Biochemical experiments demonstrate that plasmas induce strand scissions and crosslinking of plasmid DNA, and reduction of enzyme activity; the degradation is power dependent with total sample loss occurring in 60 s at 200 W and 500 mTorr. Emission spectroscopy shows that *D. radiodurans* is volatilized into CO<sub>2</sub>, CO, N<sub>2</sub> and H<sub>2</sub>O confirming the removal of biological matter from contaminated surfaces. The O<sub>2</sub> plasma impacts several cellular components predominantly through chemical degradation by atomic oxygen. A CO<sub>2</sub> plasma, however, was not effective at degrading *D. radiodurans*, revealing the importance of plasma composition, which has implications for planetary protection and the contamination of Mars. This item ships from La Vergne, TN. Paperback.
