## Production of serine protease from sporotrichum thermophile

---

By Ali, Sikander

Book Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | In the present study, Sporotrichum thermophile ATCC 42464 was used for serine protease production using solid substrate fermentation (SSF). Wheat bran (12.5 g) was employed as the carbon source. Cultural conditions such as moisture content (MSS-12.5 ml), pH (5) and time of incubation (48 h) were optimized. The enzyme activity decreased in the presence of inhibitors (urea, SDS) and chelators (EDTA) while presence of metal ions especially Mg<sup>2+</sup> caused an increase in the activity of serine protease. The maximal enzyme activity of 18.84 U/g was observed under the conditions optimized. | Format: Paperback | Language/Sprache: english | 60 pp.

### Reviews

*Comprehensive information! Its this sort of excellent go through. It is packed with knowledge and wisdom You may like just how the author publish this book.*

-- **Mustafa McGlynn**

*Complete guideline! Its this kind of great read through. It is probably the most incredible pdf i actually have read through. Its been developed in an extremely straightforward way and it is simply soon after i finished reading this book through which actually modified me, affect the way i really believe.*
